Skills

Programming	Go, Python, Java, SQL
Databases	Postgres, MariaDB, ClickHouse, MongoDB
Backend	gRPC, Kafka, REST APIs, Prometheus
DevOps	Git, Docker, Kubernetes, GitLab CI/CD, ArgoCD, Helm
Cloud	GCP, AWS, RedHat OpenShift on Azure, Terraform
Languages	English, German

Experience

Nextron Systems

Dietzenbach, Germany

TECH LEAD BACKEND DEVELOPMENT

Jul 2025 - Present

SENIOR SOFTWARE ENGINEER

Jun 2024 - Jul 2025

- Leading backend development for Management Center and Analysis Cockpit
- Developed features in Go for Management Center and modernized the codebase and development practices
- Driving architecture and technical design decisions, shaping development processes, and contributing to product design
- Mentoring engineers, establishing testing standards, and improving backend code quality through cross-team collaboration

ESG Book

Frankfurt am Main, Germany

SOFTWARE ENGINEER III

Apr 2023 - Jun 2024

SOFTWARE ENGINEER II

May 2022 - Mar 2023

- Implemented ESG scoring methodologies in Go and Python and built batch-driven pipelines for large financial datasets
- Developed database wrappers and data delivery systems supporting ESG analytics
- Developed CI/CD pipelines and Terraform infrastructure on GCP/Kubernetes; improved testing practices and code quality

Senacor Technologies AG

Frankfurt am Main, Germany

FULL-STACK DEVELOPER

Feb 2021 - Apr 2022

- Developed a near real-time, event-driven data store on Azure with services in Java
- Created an AWS Lambda webhook service with Kafka integration and a subscription management REST API
- Developed and took ownership of infrastructure-as-code components

Edinburgh Napier University

Remote, United Kingdom

LAB DEMONSTRATOR

Sep 2020 - Dec 2020

- Supported practical sessions for the Software Engineering 3 module, helping students resolve technical questions and problems

MarketAxess

London, United Kingdom

BUSINESS ANALYST INTERN

Jun 2019 - Aug 2019

- Produced high-level and detailed business specifications for trading system enhancements
- Acted as Product Owner in Scrum, working with stakeholders to prioritize client needs and enhancements for developers
- Created financial models to provide better metrics to the sales team

Morgan Stanley

Glasgow, United Kingdom

INDUSTRIAL PLACEMENT IN APPLICATION DEVELOPMENT

Jun 2018 - May 2019

- Optimized a trading system component, improving performance 70–80× and reducing maintenance pressure
- Led a cross-team feature migration from Perl scripts to Java Spring Boot, increasing revenue and client retention
- Built a project templating solution used across the firm, reducing setup time and improving developer productivity

Education

Edinburgh Napier University

Edinburgh, United Kingdom

BENG (HONS) SOFTWARE ENGINEERING — FIRST CLASS

Sep 2016 - Dec 2020

- Studied software design, development and testing, including real-time, mobile and large-scale enterprise systems
- As programme representative, collected feedback from peers and presented it to academic staff
